

I moved to El Paso from the Indianapolis area 10 years ago and was very disappointed by the radio content. My husband and I are NASCAR fans and no station in El Paso airs any races. We can now get the races while we are out on the lake, in the car, or just out by the pool by listening to satellite radio. I don't see why the NAB should be able to tell me locally that I can not once again listen to the races. Please don't change the satellite radio format. If I am willing to pay for radio service, then I should be able to listen to what I want.

We aren't in an area with traffic or radio yet, but if it was available it would be valuable to me in my commute to and from work.

Please reject NAB's petition 04-160 - Thanks!
